MONITOR'S FIFTH REPORT

I. INTRODUCTION

This report, the Monitor's fifth pursuant to the Settlement Agreement, provides an update on Credit Suisse's efforts to comply with its obligation to provide consumer relief pursuant to that agreement, and sets forth the Monitor's assessment of Credit Suisse's compliance to date.¹

The primary subject of this Report is the Monitor's testing of an additional 3,201 principal forgiveness and principal forbearance loan modifications, which were submitted by Credit Suisse to the Monitor for credit in December 2018. As a result of that testing, the Monitor found that Credit Suisse was entitled to receive a total of \$83,410,909.54 in credit for 3,200 of those loan modifications towards its consumer relief obligation. In addition to testing for eligibility and validating credit amounts, the Monitor analyzed the loan modifications to gauge their overall impact on the borrowers who received them. On average, the modifications reduced borrowers' monthly payments by 27%, or \$284.

On January 18, 2017, Credit Suisse Securities (USA) LLC, together with its current and former U.S. subsidiaries and U.S. affiliates (collectively, "Credit Suisse"), entered into an agreement with the U.S. Department of Justice ("DOJ") to resolve claims related to Credit Suisse's alleged unlawful conduct in connection with the packaging and sale of residential mortgage-backed securities, or "RMBS," between 2005 and 2007 (the "Settlement Agreement").²

To remediate harms resulting from Credit Suisse's alleged unlawful conduct, the Settlement Agreement requires Credit Suisse to provide consumer relief to distressed borrowers and others affected by the financial crisis.³ Specifically, the Settlement Agreement provides that Credit Suisse must earn \$2.8 billion in "credit" by providing various types of consumer relief in two main categories.⁴ First, Credit Suisse must give loan modifications to homeowners who are having difficulty making their mortgage payments or who owe more than their homes are worth.⁵ Second, Credit Suisse must provide funding to construct, rehabilitate, or preserve affordable housing developments for low-income residents.⁶

The Settlement Agreement required that Credit Suisse engage an independent monitor to oversee and periodically report to the public on Credit Suisse's progress towards meeting its consumer relief obligation.⁷ Neil M. Barofsky of the law firm Jenner & Block LLP was appointed to serve as the independent monitor (collectively, the "Monitor").⁸

The Monitor has published four reports to date:

- Initial Report. On October 27, 2017, the Monitor published its initial report pursuant to the Settlement Agreement (the "Initial Report").⁹ Among other things, the Initial Report described Credit

Suisse's plan for complying with its consumer relief obligation by completing first lien principal forgiveness and principal forbearance modifications for borrowers. The Initial Report explained that Credit Suisse is relying on Select Portfolio Servicing, Inc. ("SPS"), its mortgage servicer subsidiary, to complete these modifications. The Initial Report outlined the types of principal forgiveness and principal forbearance loan modifications that qualify for credit under the Settlement Agreement, as well as the amount of credit that Credit Suisse may earn for completing these types of loan modifications. In addition, the Initial Report described Credit Suisse's preliminary efforts to provide no-interest loans to developers of affordable rental housing.

- Second Report. On February 20, 2018, the Monitor published its next report (the "Second Report"), which provided an update on Credit Suisse's efforts to provide consumer relief pursuant to the Settlement Agreement, including a discussion of the Monitor's and Credit Suisse's ongoing work to finalize the eligibility, credit calculation, and testing protocols governing the principal forgiveness and principal forbearance loan modifications contemplated by SPS.¹⁰ The Second Report noted that, after the protocols were finalized, the next step would be for Credit Suisse to submit an initial sample of 100 completed principal forgiveness and principal forbearance loan modifications to the Monitor.
- Third Report. On August 31, 2018, the Monitor published its third report (the "Third Report"), which principally discussed the Monitor's testing of the initial 100-loan sample.¹¹ The Third Report explained that, because Credit Suisse's regular submissions of loan modifications would typically include thousands of loans, reviewing a smaller set of 100 loans at the outset was important because the Monitor, Credit Suisse, and SPS were able to work through any issues as early as possible. As a result of the Monitor's testing of the 100-loan sample, the Monitor confirmed that the protocols the Monitor developed with Credit Suisse and SPS were functioning as envisioned. The Monitor also found that Credit Suisse was entitled to receive a total of \$3,477,702.94 in credit towards its consumer relief obligation, which was the full amount that Credit Suisse had claimed for credit.
- Fourth Report. On February 28, 2019, the Monitor published its fourth report (the "Fourth Report"), which focused on the Monitor's testing of 3,249 principal forgiveness and principal forbearance loan modifications that were submitted for credit in June 2018 and September 2018.¹² The Fourth Report also explained how the Monitor used statistical sampling as a way to confirm the eligibility and credit amounts for each loan modification. As a result of the Monitor's testing of the June 2018

and September 2018 loan submissions, the Monitor found that Credit Suisse had earned a total of \$73,379,894.73 in credit as of the date of the Fourth Report.

In addition to publishing these periodic reports, the Monitor has established a website with information about the Settlement Agreement (www.creditsuisse.rbmsmonitor.com). The Monitor's website answers frequently asked questions about the agreement and provides the Monitor's contact information. The website lists resources for distressed borrowers and homeowners facing foreclosure, including contact information for free or low-cost tax and legal services, as well as information about Credit Suisse-sponsored borrower outreach events. In addition, the website includes interactive maps showing the total number of loan modifications and the amount of principal forgiveness and principal forbearance for which Credit Suisse has received credit toward its consumer relief obligation at the national, state, and county levels. The maps will be updated periodically.

This Report, and all previous and subsequent reports, are or will be posted on the Monitor's website for the duration of the monitorship.

II. THE DECEMBER 2018 LOAN MODIFICATION SUBMISSION

As discussed in the Monitor's prior reports, Credit Suisse's current plan to meet its loan modification relief obligations under the Settlement Agreement is to submit principal forgiveness and principal forbearance loan modifications completed by its mortgage servicer subsidiary SPS. To this end, Credit Suisse has been submitting batches of completed principal forgiveness and principal forbearance loan modifications to the Monitor for credit on a periodic basis.¹³

In December 2018, Credit Suisse provided the Monitor with its fourth submission of loan modifications. Prior to making this submission, SPS and Credit Suisse's Internal Review Group ("IRG") had each reviewed the loan modifications to verify eligibility and calculate credit amounts, using the same procedures outlined in the Monitor's prior reports.

The Monitor performed a battery of tests to confirm that those loan modifications met the requirements of the Settlement Agreement, and to validate the credit amounts claimed by Credit Suisse. Credit Suisse's December 2018 submission originally included a total of 3,201 loan modifications, for which Credit Suisse claimed a total of \$83,448,242.16 in credit. Credit Suisse subsequently amended its submission to remove one loan modification involving principal forbearance relief because the Monitor's testing revealed certain issues with the data for that loan that, once corrected, resulted in the loan being ineligible for credit. As amended, the December 2018 submission included 3,200 loan modifications, for which Credit Suisse claimed a total of \$83,410,909.54 in credit.

Ultimately, the Monitor's testing showed that the remaining 3,200 loan modifications were eligible for credit, and that Credit Suisse was entitled to receive the full amount of credit it had claimed for those 3,200 modifications – \$83,410,909.54 – towards its consumer relief obligation.

Both Credit Suisse and SPS cooperated fully and acted with considerable diligence and transparency in assisting the Monitor with its testing of the December 2018 loan submission.

Summary of Consumer Relief Credit Earned for Amended December 2018 Submission	
Total Original Amount of Credit Claimed	\$83,448,242.16
Total Amended Amount of Credit Claimed	\$83,410,909.54
Total Amount of Credit Earned	\$83,410,909.54
Total Number of Modifications Earning Credit	3,200
Average Decrease in Borrower's Monthly Mortgage Payment	27% / \$284
Total Amount of Credit Arising from Loans Owned by Credit Suisse	\$584,814.17

A. Results of Testing

1. Principal Forgiveness Relief

As discussed in the Monitor's prior reports, Credit Suisse can receive credit under the Settlement Agreement by modifying first lien mortgage loans so that the borrower does not have to pay back the full amount of the loan.¹⁴ This type of modification, called "principal forgiveness," is discussed in greater detail in the [Initial Report, at Part II.A.2.a.](#)

In the December 2018 submission, Credit Suisse submitted 189 principal forgiveness loan modifications to the Monitor, for which it claimed \$15,127,779.79 in credit.¹⁵ The Monitor followed the same testing

procedures outlined in the Monitor's prior reports to verify the eligibility of the loans and to calculate the credit that Credit Suisse earned for them. Pursuant to its testing protocol, the Monitor tested 121 of the principal forgiveness loan modifications and determined that all were eligible for credit in the amounts claimed. The Monitor therefore validated \$15,127,779.79 in principal forgiveness credit, the total amount claimed by Credit Suisse.

Summary of Principal Forgiveness Credit Earned for Amended December 2018 Submission	
Total Credit Claimed	\$15,127,779.79
Total Credit Earned	\$15,127,779.79
Total Number of Modifications Earning Credit	189
Total Amount of Principal Forgiveness to Borrowers (including Earned Forgiveness)	\$10,484,356
Total Amount of Principal Forgiveness to Borrowers on Loans Owned by Credit Suisse	\$0

Loan Owner. All but one of the loans for which Credit Suisse earned principal forgiveness credit were owned by RMBS trusts. The remaining loan was owned by a financial institution unrelated to Credit Suisse.

Geographic Distribution. Nearly half of the loan modifications (87 loans, or 46%) for which Credit Suisse earned principal forgiveness credit were performed on loans secured by properties in five states: Maryland (22 loans, or 12%), Florida (21 loans, or 11%), Georgia (15 loans, or 8%), New York (15 loans, or 8%), and Pennsylvania (14 loans, or 7%). The Monitor's website (www.creditsuisse.rbsmonitor.com) includes interactive maps depicting the total number of loan modifications and cumulative amount of principal forgiveness for which Credit Suisse has received credit to date at the national, state, and county levels. Appendix A to this Report also summarizes the distribution of credit earned by Credit Suisse at the census block level, as required by the Settlement Agreement.

Earned Versus Immediate Principal Forgiveness. Credit Suisse earned the vast majority of its principal forgiveness credit through earned

principal forgiveness loan modifications (\$15,121,183, or 99.06% of credit), rather than through immediate principal forgiveness loan modifications (\$6,597, or 0.04% of credit). As discussed in the Monitor's prior reports, immediate principal forgiveness is when the total amount to be forgiven is written off the moment the loan modification becomes permanent.¹⁶ Earned principal forgiveness, in contrast, occurs over time, and as long as the borrower remains current on the modified loan, one-third of the earned forgiveness amount is forgiven on each of the first, second, and third anniversaries of the modification.¹⁷ Under the Settlement Agreement, Credit Suisse receives credit based on the full amount of the earned principal forgiveness, even if the forgiveness ultimately does not occur because the borrower fails to remain current on her loan during the earned forgiveness period.¹⁸

Credit Enhancements. Notably, the December 2018 submission was the first submission to include loans that received the credit enhancement for helping borrowers increase ownership interest in their homes. As explained in the Initial Report, Credit Suisse receives additional credit when the loan modification helps increase the borrower's equity beyond a certain threshold and thereby materially augments his or her ownership in the home.¹⁹ The amount of extra credit depends on how much the loan modification helps a borrower build an ownership interest in the home, which is measured by the loan-to-value ratio.²⁰ Specifically, if the borrower's post-modification loan-to-value ratio is between 100% and 90%, Credit Suisse receives a 115% credit enhancement on the portion of the principal reduction that decreases the loan-to-value ratio below 100%.²¹ If the borrower's post-modification loan-to-value ratio is between 90% and 76%, Credit Suisse also receives a 120% credit enhancement on the additional portion of the principal reduction that decreases the loan-to-value ratio below 90%.²² If the borrower's post-modification loan-to-value ratio is equal to or less than 75%, Credit Suisse receives a 125% credit enhancement for the entire amount of principal forgiveness.²³

Eleven loan modifications qualified for some form of this credit enhancement, resulting in a total credit enhancement of \$31,079. Six of these modifications reduced the borrower's loan-to-value ratio to between 100% and 90%; three modifications reduced the borrower's loan-to-value ratio to between 90% and 76%; and two modifications reduced the borrower's loan-to-value ratio to below 75%.

The December 2018 submission was also the first submission for which not all of the principal forgiveness loan modifications qualified for the "Enhanced Early Incentive Credit." SPS completed 159 modifications by November 1, 2017, making them eligible for the 150% "Enhanced Early Incentive Credit," and 30 modifications were completed by March 1, 2018, making them eligible for 115% "Early Incentive Credit." The Monitor determined that Credit Suisse was entitled to \$4,569,699 of "Enhanced

Early Incentive Credit” and \$185,046 of “Early Incentive Credit,” resulting in total early credit enhancements of \$4,754,745.

Borrower Impact. In addition to testing for eligibility and validating credit amounts, the Monitor analyzed the loan modifications to gauge their overall impact on the borrowers who received them. On average, the principal forgiveness modifications reduced borrowers’ monthly payments by 33%, or \$387.

Summary of Impact of Principal Forgiveness Loan Modifications on Borrowers	
Average Decrease in Borrower’s Monthly Mortgage Payment	33% / \$387
Average Amount Borrowers Owed Prior To Modification	\$206,467
Average Amount of Forgiveness	\$55,473
Average Pre-Modification Interest Rate	5.83%
Average Post-Modification Interest Rate	4.28%

2. Principal Forbearance Relief

As discussed in the Monitor’s prior reports, Credit Suisse can receive credit by modifying first lien mortgage loans to defer all payments on a portion of principal until the end of the term of the loan.²⁴ This type of modification, called “principal forbearance,” is discussed in greater detail in the [Initial Report, at Part II.A.2.b.](#)

In the December 2018 submission, Credit Suisse originally submitted 3,012 principal forbearance modifications to the Monitor, for which it claimed \$68,320,462.37 in credit.²⁵ As explained in more detail on pages 13-14 below, Credit Suisse subsequently amended its submission to remove one loan modification due to an issue the Monitor found during its review with respect to data that misidentified the county in which the property securing that loan was located. Once the correct county was identified for the loan, it was subject to a lower conforming loan limit, rendering it ineligible for credit. As amended, the December 2018 submission included 3,011 principal forbearance modifications, for which Credit Suisse claimed \$68,283,129.75 in credit.²⁶

The Monitor followed the testing procedures outlined in the Monitor's prior reports to verify the eligibility and calculate credit for the loans. Pursuant to its testing protocol, the Monitor tested 298 of the loan modifications in the amended December 2018 submission and determined that all were eligible for credit in the amounts claimed. The Monitor therefore validated the total credit amount claimed by Credit Suisse in that submission – \$68,283,129.75 – for the remaining population of 3,011 loan modifications.

Summary of Principal Forbearance Credit Earned for Amended December 2018 Submission	
Total Original Amount of Credit Claimed	\$68,320,462.37
Total Amended Amount of Credit Claimed	\$68,283,129.75
Total Credit Earned	\$68,283,129.75
Total Number of Modifications Earning Credit	3,011
Total Amount of Principal Forbearance to Borrowers (including Earned Forgiveness Credited as Forbearance)	\$147,881,848
Total Amount of Principal Forbearance to Borrowers on Loans Owned by Credit Suisse	\$1,086,539

Loan Owner. The overwhelming majority of the loans (2,871 loans) for which Credit Suisse earned principal forgiveness credit were owned by RMBS trusts. Twenty-six loans were owned by Credit Suisse, and 114 loans were owned by financial institutions other than Credit Suisse.

Geographic Distribution. More than one-third of the loan modifications (1,175 loans, or 39%) for which Credit Suisse earned principal forbearance credit were performed on loans secured by properties in five states: California (299 loans, or 10%), Florida (263 loans, or 9%), New York (250 loans, or 8%), Illinois (192 loans, or 6%), and Texas (171 loans, or 6%). The Monitor's website (www.creditsuisse.rmbsmonitor.com) includes interactive maps depicting the total number of loan modifications and cumulative amount of principal forbearance for which Credit Suisse has received credit to date

at the national, state, and county level. Appendix A to this Report also summarizes the distribution of credit earned by Credit Suisse at the census block level, as required by the Settlement Agreement.

Credit Enhancements. The December 2018 submission was the first submission for which not all of the principal forbearance loans qualified for the “Early Incentive Credit.” The Monitor determined that 2,864 of the principal forbearance modifications were offered or completed by March 1, 2018. Therefore, the 115% “Early Incentive Credit” was applied to them, resulting in a total credit enhancement of \$8,636,564.²⁷ The remaining 147 loans were offered after March 1, 2018, and therefore did not receive the enhancement.

Borrower Impact. In addition to testing for eligibility and validating credit amounts, the Monitor analyzed the loan modifications to gauge their overall impact on the borrowers who received them. On average, the principal forbearance modifications reduced borrowers’ monthly payments by 26%, or \$278.

Summary of Impact of Principal Forbearance Loan Modifications on Borrowers	
Average Decrease in Borrower’s Monthly Mortgage Payment	26% / \$278
Average Amount Borrowers Owed Prior To Modification	\$201,984
Average Amount of Forbearance	\$49,114
Average Pre-Modification Interest Rate	5.28%
Average Post-Modification Interest Rate	3.87%

B. Review of Other Consumer Relief Requirements

Census Block Information

The Settlement Agreement requires Credit Suisse to report loan modification data to the Monitor at the census block level, and for the Monitor to report on the distribution of the credit earned by Credit Suisse at that level.²⁸ Appendix A to this Report summarizes the distribution of credit earned by Credit Suisse for the December 2018 submission at the census block level.

Census blocks are the smallest level of geography for which the U.S. Census Bureau provides demographic data.²⁹ Census blocks are smaller than counties and can be as small as a city block.³⁰ The U.S. Census Bureau delineates census blocks once every ten years.³¹

Credit Suisse initially reported census block data to the Monitor that SPS had identified using a methodology that resulted in incorrect information for a significant number of loans. Specifically, in the June and September 2018 loan submissions, the Monitor found errors in the census block data provided by Credit Suisse for approximately 6% of the loans, which suggested a systemic issue in the process used by SPS to collect the data. For these prior loan submissions, the Monitor and SPS manually reviewed the loans at issue to fix the identified errors in the census block information prior to issuing the Fourth Report.

However, because manually correcting the identified errors was a time-intensive and laborious process, the Monitor and SPS worked together to develop a more accurate, automated process for identifying census block information for the properties securing the loans submitted for credit. This automated process involves converting the property address at issue to latitude and longitude coordinates using a publicly available database, and then using information provided by the U.S. Census Bureau to identify the census block that corresponds to those coordinates.

Although far more accurate than SPS's prior approach, the Monitor has still noted occasional errors in the census block data identified through the new process, primarily due to differences in the way property addresses are recorded in SPS's system and the latitude and longitude database. These differences can sometimes result in incorrect latitude and longitude coordinates for the applicable property. For example, SPS's systems may record a property's address as "123 Main Street North," but the latitude and longitude database may only recognize "123 North Main Street" as the address for that particular property. As a result, using a particular variation of an address can cause the address to be translated into incorrect latitude and longitude coordinates, which in turn can result in the identification of the incorrect census block for that address.

For the loans in the December 2018 submission, Credit Suisse provided census block data to the Monitor that SPS identified using the new automated process described above. The Monitor tested the census block data for the 419 principal forgiveness and principal forbearance loans in its sample, and concluded that the census blocks for two of the loans in the sample were incorrect, which represented an error rate of less than 0.5%. The Monitor also determined that the two incorrectly reported census blocks were at most 1.5 miles away from the correct census blocks. After the Monitor identified these issues, Credit Suisse corrected the census block information for the two loans. The Monitor validated the remaining census block information provided by Credit Suisse because the

Monitor found the errors to occur in a very small portion of the sample and that these two cases were the result of minor inconsistencies in the formatting of the address as described above, and therefore were not representative of a systematic deficiency.

Going forward, SPS will continue to use the new automated process for identifying census block data. The Monitor has approved this process based on its far lower error rate than the prior methodology, and in recognition that eliminating all errors would require a time-intensive manual review. Moreover, the remaining error rate was not material, and the errors themselves were limited to the process of translating an address into latitude and longitude coordinates, and therefore did not impact whether a loan modification was eligible for credit or the calculation of the credit amount due. For future submissions, the Monitor will continue to review a sample of the census block information provided by Credit Suisse to confirm that the automated process does not result in a material number of errors and that any identified errors are not indicative of a systemic issue.

County Information and Pre-Modification Loan Size Limit Requirement

As discussed in the Monitor's prior reports, principal forgiveness and forbearance loan modifications are not eligible for credit under the Settlement Agreement if the loans themselves exceed certain size limitations.³² Specifically, a modification is not eligible if its pre-modification loan balance exceeds the loan size limits governing **Fannie Mae's and Freddie Mac's** loan purchases and guarantees.

The applicable size limits range between \$417,000 and \$1,386,650, depending on the county in which the property is located and the number of units in the home.³³ In most counties in the United States, Credit Suisse can receive credit for forgiving and/or forbearing principal on a mortgage loan associated with a single-family home (*i.e.*, a one-unit home) only where the amount owed on the loan prior to the modification is \$417,000 or less; on a loan associated with a two-unit property where the amount owed is \$533,850 or less; on a loan associated with a three-unit property where the amount owed is \$645,300 or less; and on a loan associated with a four-unit property where the amount owed is \$801,950 or less.³⁴ In other counties, the maximum amount may be higher.³⁵ The Federal Housing Finance Agency's website lists all of the governing loan size limitations by county and number of units. This list can be accessed at <https://www.fhfa.gov/DataTools/Downloads/Pages/Conforming-Loan-Limits.aspx> ("Maximum Loan Limits for Mortgages Acquired in Calendar Year 2016").

In analyzing the census block data issue discussed above, the Monitor identified a separate issue with the county information SPS had

Fannie Mae and Freddie Mac: The Federal National Mortgage Association (commonly known as Fannie Mae) and the Federal Home Loan Mortgage Corporation (commonly known as Freddie Mac) are United States government-sponsored enterprises. Their purpose is to increase the supply of money available for mortgage lending which, in turn, increases the money available for new home purchases. Limits, referred to as "conforming loan limits," are set on the maximum amount of a loan that Fannie Mae or Freddie Mac can purchase or guarantee based on the county in which the property securing the loan is located.

used to evaluate whether certain of the loans in the December 2018 submission met the loan size limit requirement. Specifically, the county information SPS used for this purpose for certain of the loans was incorrect. After discussing this issue with SPS, the Monitor determined that, for the purpose of testing the loan size limit requirement, SPS had used the zip code of the property securing each loan to identify the county in which the property was located.³⁶ However, because certain zip codes straddle two counties, using the property's zip code resulted in the identification of incorrect county information for 76 loans.

SPS remedied this issue by providing the Monitor with the correct county information for these loans, using the new automated process described above to identify the census block data.³⁷

At the same time that SPS provided the corrected data, SPS also informed the Monitor that, when the correct county information was used, one of the loans did not meet the loan size requirement, and therefore was not eligible for credit.³⁸ For that one loan, the pre-modification balance was \$435,661. SPS originally reported that the one-unit property securing that loan was in Sussex County, New Jersey, where the governing loan size limit is \$625,500. However, the property was actually located in neighboring Warren County, New Jersey, where the governing loan size limit is \$417,000. The loan was therefore ineligible for credit.

Credit Suisse originally claimed \$37,332.62 in credit for this loan.³⁹ After learning of this issue, Credit Suisse amended its December 2018 submission to remove this one loan and reduce the amount of credit sought by that amount.⁴⁰

The Monitor confirmed that the remaining 75 loans in the December 2018 submission for which SPS provided corrected county information were still eligible for credit. The Monitor also confirmed that this county data issue did not affect the eligibility of any of the loan modifications in Credit Suisse's prior submissions.

Going forward, SPS will use the new automated process described above to identify the county in which each property is located and use that information when evaluating whether the loan size limit requirement has been met.⁴¹

Credit Suisse's Overall Consumer Relief Progress

As explained in the Initial Report, Credit Suisse must meet certain credit minimums in connection with its loan modification efforts. As of the date of this Report, the Monitor has validated a total of \$30,645,514.83 in credit for principal forgiveness loan modifications and \$126,145,289.44 in credit for principal forbearance loan modifications, for a total of \$156,790,804.27 in credit for all loan modification relief. This represents

3.13% of Credit Suisse's obligation to provide \$980 million in credit through principal forgiveness loan modifications, and 8.96% of Credit Suisse's obligation to provide \$1.75 billion in credit through all eligible loan modifications.⁴² To date, Credit Suisse has not earned any credit for principal forgiveness loan modifications performed on properties in Colorado, where Credit Suisse must use its "best efforts" to earn a total of at least \$25 million in principal forgiveness credit in 25 specified counties.⁴³

Summary of Cumulative Consumer Relief Credit			
	Credit Minimum	Credit Earned to Date	Percentage of Minimum
Principal Forgiveness Credit	\$980,000,000	\$30,645,514.83	3.13%
Principal Forbearance Credit	N/A	\$126,145,289.44	N/A
Total Loan Modification Credit	\$1,750,000,000	\$156,790,804.27	8.96%

III. OTHER CONSUMER RELIEF-RELATED EFFORTS TO DATE

A. Borrower Outreach Events

Under the Settlement Agreement, Credit Suisse must hold three borrower outreach events each year until the Monitor certifies that Credit Suisse has satisfied its consumer relief obligation.⁴⁴ The Initial Report details the specific requirements for these outreach events.⁴⁵ As discussed in the Initial Report, Credit Suisse designated SPS to coordinate and hold the required outreach events.⁴⁶

1. Illinois Event

On March 16, 2019, the Monitor attended SPS's first outreach event for the 2019 calendar year in Illinois.⁴⁷ The event took place at the Hyatt Place Chicago Midway Airport, in Chicago, Illinois, from 9:00am to 5:00pm local time.⁴⁸

Monitor's Observations

Consistent with prior events, the first outreach event of 2019 ran smoothly, and SPS staff were cordial, professional, and demonstrated a commitment to customer service as they interacted with borrowers.

Comparison with Prior Events

SPS Personnel. In response to a large number of RSVPs for the event, SPS staffed the Illinois event with more personnel than any prior outreach event – adding two additional counselors in the days leading up to the event. Twenty-two SPS employees attended the event, including 17 loss mitigation counselors, four senior managers, and one information technology employee. Five counselors were bilingual in Spanish and English. No other language assistance was needed.

Utilization and Wait Time. The event drew one of the largest crowds to date for SPS's outreach events, with 132 borrowers in attendance.⁴⁹ SPS's staffing was sufficient, and generally kept wait times between five and ten minutes. During the event's peak, the longest wait time the Monitor observed was approximately 20 minutes. Borrowers arrived at a fairly steady pace throughout the day, and the Monitor did not observe any period in which no counselors were working with borrowers.

Same-Day Decisions. SPS provided nine same-day, on-site decisions, four of which were trial modifications.

Non-Profit Organizations' Attendance. Two housing counselors from AGORA Community Services, a Chicago-based non-profit, attended the Illinois event. These counselors provided financial planning and mortgage counseling to borrowers in attendance at the event.

Event Metrics

Number of Invitees and Attendees. SPS sent invitations to 4,084 borrowers. One hundred twenty-two borrowers formally RSVP'd for the event. One hundred thirty-two borrowers ultimately attended, resulting in an approximate 3.2% return rate on attendance.⁵⁰ The majority of customers polled by SPS said that they had learned of the event through the mailed invitation.

Outcome. According to SPS, as of July 26, 2019, SPS was still evaluating 17 accounts with borrowers in attendance for mortgage assistance. The borrowers for 15 of these accounts were still collecting the documentation necessary for SPS's review of their accounts.⁵¹

Outcome	Number of Borrower Accounts
Pending Decision (All Documents Received)	2
Pending Documents	15
Mortgage Assistance Offered	72
No Mortgage Assistance Offered	34
Did Not Request Mortgage Assistance	9

Types of Mortgage Assistance Offered. As of July 26, 2019, SPS had offered some type of mortgage assistance option to 72 borrower accounts (55%), including 27 accounts (20%) where SPS offered a trial loan modification. SPS offered payment deferral to five accounts and a repayment plan to 36 accounts.⁵²

Mortgage Assistance Offered	Number of Borrower Accounts
Trial Loan Modification	27
Payment Deferral	5
Repayment Plan	36
Short Sale Listing Period	2
Short Sale	1
Deed-In-Lieu of Foreclosure	1

Loan-to-Value Ratio. As at prior events, borrower accounts' loan-to-value ratios varied. Approximately 54% of the accounts in attendance had a loan-to-value ratio greater than 100% (based on the most recent property value in SPS's system, which may not be within the last 90 days); approximately 19% had a loan-to-value ratio between 80% and 100%; and approximately 14% had a loan-to-value ratio below 80%. Specifically, the loan-to-value ratios were distributed as follows.⁵³

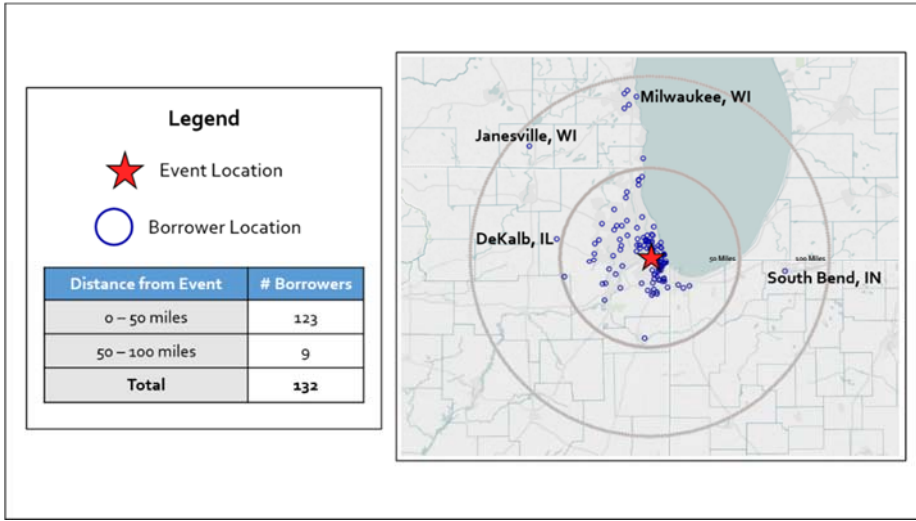

Loan-to-Value Ratio	Number of Borrower Accounts
< 80%	18
80% - 100%	25
> 100%	71
Second Lien	5
Unknown: No Property Valuation Conducted by SPS as of the Date of the Event	13

Delinquency Status. The vast majority of accounts with borrowers in attendance (approximately 94%) were classified as delinquent by SPS (*i.e.*, they were 30 or more days past due on their mortgage loan payments). The distribution of delinquency statuses was as follows.⁵⁴

Delinquency Status	Number of Borrower Accounts
Current	8
30-90 Days	41
120 + Days	83

Distance Traveled. Borrowers traveled from as far away as Milwaukee, Wisconsin (93.2 miles). However, more than 75% of borrowers traveled fewer than 25 miles, and 44% traveled fewer than 10 miles to attend the event. Approximately 7% of the borrowers traveled more than 50 miles.

Distance Traveled to Illinois Outreach Event

Cost. SPS calculated that the event cost \$37,959.25, which includes costs for travel and lodging of SPS personnel, renting the event space, food, and overtime pay for hourly employees.⁵⁵

2. Texas Event

On June 22, 2019, the Monitor attended SPS's second outreach event for the 2019 calendar year in Texas.⁵⁶ The event took place at the Houston Airport Marriott at George Bush Intercontinental, in Houston, Texas, from 9:00am to 5:00pm local time.⁵⁷

Monitor's Observations

Consistent with prior events, the second outreach event of 2019 ran smoothly, and SPS staff were cordial, professional, and demonstrated the same commitment to customer service as they interacted with borrowers.

Comparison with Prior Events

SPS Personnel. Fifteen SPS employees attended the event, including eleven loss mitigation counselors, three senior managers, and one information technology employee. Six counselors were bilingual in Spanish and English. No other language assistance was needed.

Utilization and Wait Time. Forty-six borrowers attended the event, which was fewer than the number of RSVPs that SPS received for the event. SPS's staffing was sufficient, and the majority of borrowers did not have to wait to be seen. During the event's peak, the longest wait time the Monitor observed was approximately ten minutes.

Same-Day Decisions. SPS provided five same-day, on-site decisions.⁵⁸

Event Metrics

Number of Invitees and Attendees. SPS sent invitations to 2,185 borrowers. Fifty-six borrowers formally RSVP'd for the event. Forty-six borrowers ultimately attended to discuss a total of 49 accounts, resulting in an approximate 2.1% return rate on attendance.⁵⁹ The majority of borrowers polled by SPS said that they had learned of the event through the mailed invitation.

Outcome. According to SPS, as of July 26, 2019, SPS was still evaluating 16 accounts with borrowers in attendance for mortgage assistance. The borrowers for these accounts were still collecting the documentation necessary for SPS's review of their accounts.⁶⁰

Outcome	Number of Borrower Accounts
Pending Decision (All Documents Received)	0
Pending Documents	16
Mortgage Assistance Offered	17
No Mortgage Assistance Offered	9
Did Not Request Mortgage Assistance	7

Types of Mortgage Assistance Offered. As of July 26, 2019, SPS had offered some type of mortgage assistance option to 17 borrower accounts (35%), including seven accounts (14%) where SPS offered a trial loan modification. SPS offered payment deferral to three accounts and a repayment plan to five accounts.⁶¹

Mortgage Assistance Offered	Number of Borrower Accounts
Trial Loan Modification	7
Payment Deferral	3
Repayment Plan	5
Short Sale Listing Period	1
Assumption	1

Loan-to-Value Ratio. As at prior events, borrower accounts' loan-to-value ratios varied. Approximately 6% of the accounts in attendance had a loan-to-value ratio greater than 100% (based on the most recent property value in SPS's system, which may not be within the last 90 days); approximately 10% had a loan-to-value ratio between 80% and 100%; and approximately 73% had a loan-to-value ratio below 80%. Specifically, the loan-to-value ratios were distributed as follows.⁶²

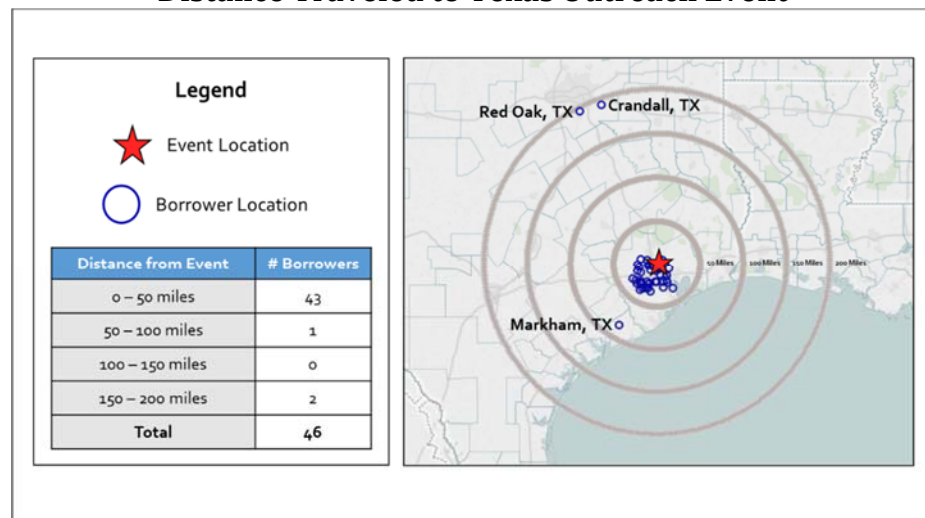

Loan-to-Value Ratio	Number of Borrower Accounts
< 80%	36
80% - 100%	5
> 100%	3
Second Lien	3
Unknown: No Property Valuation Conducted by SPS as of the Date of the Event	2

Delinquency Status. The vast majority of accounts with borrowers in attendance (approximately 96%) were classified as delinquent by SPS (*i.e.*, they were thirty or more days past due on their mortgage loan payments). The distribution of delinquency statuses was as follows.⁶³

Delinquency Status	Number of Borrower Accounts
Current	2
30-90 Days	16
120 + Days	31

Distance Traveled. Borrowers traveled from as far away as the Dallas-Fort Worth area (196 miles). However, more than 37% of borrowers traveled fewer than 20 miles, and 95% traveled fewer than 40 miles to attend the event. Approximately 7% of the borrowers traveled more than 50 miles.

Distance Traveled to Texas Outreach Event

Cost. SPS calculated that the event cost \$21,007.80, which includes costs for travel and lodging of SPS personnel, renting the event space, food, and overtime pay for hourly employees.⁶⁴

3. Upcoming Events

SPS will hold one additional outreach event in 2019. As of the date of this Report, SPS has not yet finalized its plans for the third and final outreach event for 2019.

B. Affordable Housing

As explained in the Initial Report, Credit Suisse must provide financing to facilitate the construction, rehabilitation, or preservation of affordable housing.⁶⁵ Of its \$2.8 billion consumer relief obligation, Credit

Suisse is required to achieve \$240 million worth of credit by funding affordable housing projects.⁶⁶

Credit Suisse is facilitating affordable housing development by providing loans to developers that are second or junior in priority to a senior loan made by a commercial bank.⁶⁷ Unlike the senior loan, which bears interest at the market rate and which the lender expects to be repaid, the subordinate loans provided by Credit Suisse bear no interest and are not expected to be fully repaid, if they are repaid at all.⁶⁸ As of the date of this Report, Credit Suisse informed the Monitor that it has provided approximately \$48,553,379 in funding to 34 affordable housing projects.⁶⁹ In addition, Credit Suisse has committed to provide \$4,879,956 in funding to another five affordable housing projects.⁷⁰

The Monitor and Credit Suisse have agreed upon the eligibility and credit calculation protocols governing Credit Suisse's affordable housing financing efforts. These protocols establish the criteria to determine whether the financing Credit Suisse provides to an affordable housing development is eligible for credit under the Settlement Agreement and, if so, the amount of the credit.⁷¹ Since the publication of the Monitor's last report, the Monitor and Credit Suisse finalized the IRG's testing protocol, pursuant to which Credit Suisse will confirm that its affordable housing financing is eligible for credit under the Settlement Agreement before submitting it to the Monitor for review.

Credit Suisse began submitting affordable housing relief to the Monitor for credit in June 2019.⁷² The Monitor will provide a more detailed review of the Settlement Agreement's affordable housing requirements and Credit Suisse's efforts to fulfill those requirements in a future report.

IV. CONCLUSIONS

Based on the information submitted to the Monitor and the work described in this Report, and subject to the Monitor's final determination and certification that Credit Suisse's consumer relief efforts comply with the requirements of the Settlement Agreement, the Monitor concludes:

- Credit Suisse is in compliance with the consumer relief requirements of the Settlement Agreement for the period from January 18, 2017, through the date of this Report.
- The loan modifications submitted by Credit Suisse in the amended December 2018 submission are eligible for credit under the Settlement Agreement in the amounts claimed by Credit Suisse.

- To date, Credit Suisse has earned \$30,645,514.83 in principal forgiveness credit and \$126,145,289.44 in principal forbearance credit pursuant to the Settlement Agreement.
- To date, Credit Suisse has provided the Monitor with all documents and information the Monitor has requested for the purpose of determining whether Credit Suisse has satisfied its consumer relief obligation, as required by the Settlement Agreement.
- To date, Credit Suisse has held two of the three required borrower outreach events for 2019, and those events have complied with the parameters set forth in the Settlement Agreement.

²⁶ Credit Suisse, Consumer Relief Report, July 23, 2019.

²⁷ As discussed in the Monitor's prior reports, principal forbearance credit is calculated according to the following formula: $\text{Credit} = \text{Pre-Modification Interest Rate} \times \text{Amount of Principal Forbearance} \times 8 \text{ Years}$ (presumed average remaining life of loan). See Initial Report at Part II.A.2. In the course of the Monitor's review, the Monitor determined that the pre-modification interest rate that Credit Suisse used to calculate principal forbearance credit was not necessarily the interest rate that was in effect on the loan immediately prior to the modification. Instead, Credit Suisse was using the "contractual" pre-modification interest rate, which is the interest rate in effect on the loan as of the time the borrower was last current on the loan. In some situations, the "contractual" pre-modification interest rate is the same interest rate that is in effect on the loan immediately prior to the modification. In other situations, the "contractual" pre-modification interest rate is not the same because the interest rate has either increased pursuant to a step-rate term or changed pursuant to an adjustable-rate term in the borrower's mortgage during the period beginning when the borrower was last current and ending

immediately prior to the modification. Credit Suisse and the Monitor agreed to use the “contractual” pre-modification interest rate in the principal forbearance credit calculation based on Credit Suisse’s representation that SPS does not maintain any other pre-modification rate in its system of records in a structured format. In addition, the Monitor and SPS both tested and determined that, in the aggregate, using the “contractual” interest rate results in a lower credit amount to Credit Suisse than using the interest rate in effect on the borrower’s loan immediately prior to the modification. Monitor Call with SPS, Mar. 6, 2019; Monitor Call with Credit Suisse and SPS, Mar. 4, 2019.

GLOSSARY

A list of terms used throughout the Monitor's reports appears below.

Adjustable-Rate Mortgage: Mortgage loan in which the interest rate changes over the course of the loan. Adjustable-rate mortgages generally have a lower initial rate than a borrower could obtain on a fixed-rate mortgage, but expose borrowers to the risk that interest rates will increase in the future.

Affordable Housing: Housing is typically considered "affordable" if it consumes no more than 30% of a household's income. The federal government incentivizes development of affordable housing by, among other things, awarding tax credits that can be sold to private investors who use the credits to reduce their federal tax liabilities.

Amortization Term: The period of time it would take to repay the balance of a mortgage loan in full, assuming that the borrower makes only the scheduled monthly payments over the course of the loan.

Bankruptcy: Legal proceeding involving a person or business that is unable to satisfy its liabilities. In a bankruptcy proceeding, an individual's unsecured debts, such as credit card debt, medical bills, and unsecured mortgage debt, may be extinguished.

Capitalization: Method of modifying a mortgage loan in which missed payments and other outstanding costs are added to the borrower's outstanding principal loan balance, and thus spread out over the remaining term of the loan.

Compensating Factors: A borrower who otherwise may not qualify for a loan due to insufficient credit score or income, for example, may have "compensating factors" that outweigh the shortcoming and warrant issuance of the loan. Some common compensating factors are low non-housing debt, strong career growth potential, additional income sources, exceptional credit history, or projected significant cash reserve after purchasing the home.

Credit Suisse: Credit Suisse Securities (USA) LLC, together with its current and former U.S. subsidiaries and U.S. affiliates. Credit Suisse is one of the parties to the Settlement Agreement.

Debt-to-Income Ratio: Ratio between a borrower's total monthly debts and her gross monthly income. For purposes of the Settlement Agreement, this ratio compares the borrower's monthly mortgage payments and related housing expenses (such as property taxes, and homeowners and mortgage insurance) to her gross monthly income. For more information and illustrative examples, refer to the Initial Report, at Part II.A.2.a.

The Department of Justice ("DOJ"): Principal federal law enforcement agency of the United States, with the authority to seek both civil and criminal penalties for violations of federal law. DOJ is one of the parties to the Settlement Agreement.

Due Diligence: Appropriate level of attention or care a reasonable person should take before entering into an agreement or a transaction with another party. In finance, often refers to the process by which one company conducts an investigation or review of an asset before buying the asset from another company.

Earned Principal Forgiveness: Method of modifying a mortgage loan in which a portion of the unpaid principal balance of the loan is forgiven over time, provided the borrower remains current on the modified loan.

Equal Credit Opportunity Act ("ECOA"): Federal law, codified at 15 U.S.C. § 1691(a), that generally prohibits creditors from discriminating against credit applicants with respect to any aspect of a credit transaction. For example, the ECOA prohibits creditors from discriminating against credit applications on the basis of race, color, religion, national origin, sex or marital status, or age (provided the applicant has the capacity to contract), or because all or part of the applicant's income derives from any public assistance program.

Fair Housing Act ("FHA"): Federal law, codified at 42 U.S.C. § 3605(a), that makes it unlawful for any person or other entity who engages in residential real estate-related transactions to discriminate against any person in such transactions because of race, color, religion, sex, handicap, familial status, or national origin.

Fannie Mae and Freddie Mac: The Federal National Mortgage Association (commonly known as Fannie Mae) and the Federal Home Loan Mortgage Corporation (commonly known as Freddie Mac) are United States government-sponsored enterprises. Their purpose is to increase the supply of money available for mortgage lending which, in turn, increases the money available for new home purchases.

First Lien: Lien that has priority over all other liens or claims on a property, other than a tax lien or certain other liens pursuant to state law (*i.e.*, mechanic's lien), in the event of borrower default.

Fixed-Rate Mortgage: Mortgage loan with an interest rate that does not change over the course of the loan.

Foreclosure: Legal process in which a borrower who has failed to make timely payments on a mortgage loan loses ownership of her home. It is not automatic, but must be initiated by the lender, and it may or may not require the lender to seek a court's approval. It may transfer ownership of the home to the lender or may allow the lender to auction the home and keep all proceeds up to the amount owed to the lender.

Fourth Report: Report published by the Monitor on February 28, 2019.

Gross Monthly Income: The total amount of income a borrower receives each month, including salary, pension, Social Security, public assistance, and other sources.

Held-for-Sale: Under U.S. Generally Accepted Accounting Principles ("U.S. GAAP"), an accounting treatment for mortgage loans the owner of which is looking to sell to another entity.

Held-for-Investment: Under U.S. Generally Accepted Accounting Principles ("U.S. GAAP"), an accounting treatment for mortgage loans the owner of which intends to hold onto for at least the foreseeable future.

Home Affordable Modification Program ("HAMP"): Loan modification program of the U.S. Department of the Treasury and U.S. Department of Housing and Urban Development, intended to help struggling homeowners reduce monthly mortgage payments to affordable, sustainable levels and prevent avoidable foreclosures. Part of the broader "Making Home Affordable" initiative, created by the federal government in 2009 as part of the Treasury Department's Troubled Asset Relief Program. HAMP ended in 2016. For more information, refer to the Initial Report, at Part II.A.1.

Immediate Principal Forgiveness: Method of modifying a mortgage loan in which a portion of the principal balance of the loan is written off the moment the loan modification becomes permanent.

Imminent Default: Condition in which it is reasonably foreseeable that a borrower will not be able to make his or her next mortgage payment, typically due to a hardship such as job loss, reduced hours, death of a spouse, unexpected illness, etc. Loans in imminent default may be eligible for a loan modification.

Initial Report: Report published by the Monitor on October 27, 2017.

Internal Review Group ("IRG"): Internal Credit Suisse group composed of senior Credit Suisse personnel from various business areas and functions, including the CEO of Credit Suisse Global Markets, the General Counsel for Credit Suisse Global Markets and Credit Suisse Holdings (USA) Inc., and additional personnel from Legal, Compliance, Finance, and Internal Audit, among others. The Internal Review Group reviews Credit Suisse's consumer relief activities to confirm that they meet the requirements of the Settlement Agreement before submitting that consumer relief to the Monitor for credit.

Investor Current Borrower Incentive: Incentive paid to Credit Suisse in connection with all HAMP modifications if: (1) the borrower is current at the time of trial modification; (2) the property is owner-occupied; and (3) the modification reduces the borrower's monthly housing payment, including principal, interest, taxes, and insurance costs, by at least 6%. If these conditions are satisfied, Credit Suisse receives a flat payment of \$1,500. For more information, refer to the Third Report, at Part II.C.3.c.

Investor Home Price Decline Protection Incentive: Incentive paid to Credit Suisse in connection with all HAMP modifications annually on the first two anniversaries of the modification if the borrower remains current on the loan, the monthly mortgage payment is reduced by 6%, and the borrower's property is located in an area where home prices have recently declined. For more information, refer to the Third Report, at Part II.C.3.c.

Investor Payment Reduction Cost Share Incentive: Incentive paid to Credit Suisse in connection with all HAMP modifications. It is paid on a monthly basis over 60 months so long as the borrower remains current on the loan. The amount of the incentive is calculated based on a number of factors, including a comparison of the borrower's pre-modification and post-modification monthly mortgage payments. For more information, refer to the Third Report, at Part II.C.3.c.

Junior Lien: Lien that is not a first or second lien. A junior lien is lower in priority than either a first or second lien in the event of borrower default.

Lien: Interest in property held by a creditor to secure payment of a debt. A mortgage is a type of lien.

Loan-to-Value Ratio: Ratio between the amount owed on a mortgage loan and the value of the home securing the loan. Where a borrower's loan-to-value ratio is greater than 100%, the amount the borrower owes on her mortgage exceeds the value of the home. Where the loan-to-value ratio is less than 100%, the value of the home exceeds the amount the borrower owes on her mortgage. For more information and illustrative examples, refer to the Initial Report, at Part II.A.2.

Low-Income Housing Tax Credit ("LIHTC"): Federal tax credit awarded to certain affordable rental housing projects. Once awarded, project developers sell the tax credits to private investors, who use the tax credits to reduce their federal tax liabilities. To receive the tax credit, an affordable rental housing project must meet certain requirements. For example, the project must set aside at least 40 percent of the residential units for renters earning no more than 60 percent of the area's median income (the 40/60 test) or 20 percent of the residential units for renters earning 50 percent or less of the area's median income (the 20/50 test). These units are subject to rent restrictions to ensure that the rent is affordable, which the project must maintain for at least 30 years.

Maturity Term: The length of time until the balance of a mortgage loan must be paid in full.

Monitor: Neil M. Barofsky of the law firm Jenner & Block LLP, appointed as independent monitor to oversee and periodically report to the public on Credit Suisse's progress toward meeting its total consumer relief obligation under the Settlement Agreement.

Monthly Mortgage Payment: A borrower's monthly mortgage payment includes payments of scheduled principal and interest on the loan. It does not, however, include any additional amounts that the borrower may have to pay at the end of the loan (for example, a non-interest bearing "balloon" payment).

Mortgage: When a person borrows money to buy a home, the bank receives an interest in the home called a mortgage. If the borrower does not repay the loan in a timely fashion, the mortgage gives the bank the right to obtain ownership of the home. The mortgage is said to "secure" repayment of the loan, and commonly that loan is called a "mortgage loan."

Mortgage Forgiveness Debt Relief Act of 2007: Act passed by Congress to provide relief to homeowners who otherwise would have owed taxes on forgiven mortgage debt. Debt reduced through principal forgiveness loan modifications and debt forgiven in connection with a foreclosure both qualify for this relief.

Mortgage Servicer: Company that serves an administrative function on behalf of lenders and owners of debt. Servicers typically do not originate or own the loans they service and are hired by owners of loans. A servicer's main duties are collecting payments, distributing those payments to the parties entitled to receive them, communicating with borrowers, and maintaining records. Servicers may also decide when to modify the terms of distressed loans in order to avoid foreclosure.

Non-Performing Loan: Loan on which the borrower has not made a payment in 90 days or more.

Origination: Process by which a loan is made. The lender that makes the loan is known as the originator of the loan. The originator may deal with borrowers directly or may contract brokers to find potential borrowers and evaluate loan applications.

Primary Mortgage Market Survey ("PMMS"): Survey conducted by the Federal Home Loan Mortgage Corporation of mortgage lenders across the United States to determine the average 30-year fixed-rate mortgage rate, which is then reported on a weekly basis.

Principal Forbearance: Method of modifying a mortgage loan in which the borrower's repayment of a portion of the principal is deferred until the end of the term of the loan. The principal forbearance amount is sometimes referred to as a "non-interest bearing balloon."

Principal Forgiveness: Method of modifying a mortgage loan in which the borrower's unpaid principal balance is permanently reduced.

Principal Reduction Alternative Investor Incentive: Incentive that would be paid to Credit Suisse in connection with all HAMP loan modifications that include earned principal forgiveness. For more information, refer to the Third Report, at Part II.C.3.c.

Rating Agency: In order for a debt security to be sold to a wide group of investors, a security generally receives a rating from a “rating agency.” A rating agency is not part of the federal government, but instead is a company that analyzes the security to determine the risk that investors owning the security may suffer a loss. Investors frequently consider credit ratings when making investment decisions.

Request for Mortgage Assistance: A Request for Mortgage Assistance is a form a borrower fills out and submits to her mortgage servicer if the borrower is experiencing a financial hardship and is requesting a loan modification. On SPS’s Request for Mortgage Assistance form, the borrower must give at least one reason why the borrower is having difficulty making her monthly mortgage payment.

Residential Mortgage-Backed Security (“RMBS”): Type of debt security involving a collection of mortgage loans. An investor who owns an RMBS has the right to receive a portion of the monthly payments made under the mortgage loans. RMBS can be freely traded among investors. The process by which loans are packaged into these securities is called “securitization.” For more information, refer to the Initial Report, at Part I.B.2.

RMBS Trust: Mortgage loans included in an RMBS are formally owned by a trust. The trust is set up during the securitization process for the purpose of holding the mortgage loans and administering payments in a particular RMBS. Each month, the mortgage servicer for the loans in the RMBS trust collects monthly payments from borrowers, and then remits those payments to the trust. The “trustee” for the trust is in charge of aggregating these monthly payments and then distributing them to investors in the RMBS.

Screenshot: Picture of whatever appears on a computer’s display screen at that moment in time.

Second Lien: Lien that has priority over all other liens or claims on a property, other than the first lien, a tax lien, or certain other liens pursuant to state law (*i.e.*, mechanic’s lien), in the event of borrower default. An example of a second lien is a home equity line of credit on an already-mortgaged home.

Securitization: Process of taking a group of assets that generate a regular stream of payments, like a collection of residential mortgage loans, and transforming them into a security through financial engineering. An example of securitization is a residential mortgage-backed security (“RMBS”), which is a type of security that is backed by a collection of home mortgage loans.

Select Portfolio Servicing, Inc. (“SPS”): A mortgage servicer owned by Credit Suisse.

Selection Bias: Selection of data for analysis in such a way that proper randomization is not achieved, thereby calling into question whether the sample is representative of the population intended to be analyzed.

Servicer Completed Modification Incentive: Incentive paid to SPS in connection with all HAMP modifications. The amount of the incentive is based on the number of days the borrower is past due on the loan at the time the borrower is offered a modification. If the borrower is less than or equal to 120 days past due, SPS receives a payment of \$2,000; if between 121 and 209 days past due, SPS receives \$1,600; if 210 or more days past due, SPS receives \$1,200. For more information, refer to the Third Report, at Part II.C.3.c.

Servicer Pay for Success Incentive: Incentive paid to SPS in connection with HAMP Tier 1 modifications if the modification reduces the borrower’s monthly mortgage payment by 6% or more. This incentive is paid annually for three years so long as the borrower remains current on the loan. The amount paid to SPS each year is the lesser of \$1,000 or 50% of the reduction in the borrower’s annualized monthly payment. For more information, refer to the Third Report, at Part II.C.3.c.

Settlement Agreement: Agreement of January 18, 2017, between Credit Suisse and DOJ, resolving potential claims relating to Credit Suisse’s alleged unlawful conduct in connection with the packaging and sale of residential mortgage-backed securities, or “RMBS,” between 2005 and 2007.

SPS Compliance Group: Internal SPS group responsible for performing audit and compliance functions across SPS’s business in the ordinary course. Among other things, this group is responsible for ensuring that SPS is compliant with all relevant laws and regulations, as well as internal policies and procedures.

SPS Quality Control Group: Internal SPS group responsible for confirming that the business decisions made by other SPS groups were made in accordance with SPS’s policies and procedures. For example, in the ordinary course of its business, the Quality Control group re-evaluates all loan modification applications to confirm the accuracy of the decision previously made by SPS’s loan resolution department.

Subprime Mortgage: Borrowers with the best credit histories can borrow money from banks at the so-called prime rate. Subprime mortgages carry interest rates higher than the prime rate, and are generally offered to prospective borrowers who have poor credit histories and to whom lending is therefore riskier.

Third Report: Report published by the Monitor on August 31, 2018.

Underwater: A homeowner is said to be “underwater” when the amount owed on a mortgage loan is greater than the current market value of the home. Many homeowners found themselves underwater after home values fell significantly during the 2008 financial crisis.

Underwriting Guidelines: Guidelines used by originators of mortgage loans to decide whether a borrower should be given a loan to buy a home. The guidelines are intended to ensure, among other things, that a borrower has enough income to cover his or her monthly mortgage payment, and that in the event the borrower fails to repay the loan, the value of the property on which a mortgage is given is greater than the amount borrowed.

Unpaid Principal Balance (“UPB”): Amount owed on a loan at any given time, and on which interest accrues until it is repaid.

Unsecured Mortgage Debt: Mortgage loan that was previously secured by a lien on a home (*i.e.*, at the time of origination), but now the lien no longer exists. This type of debt would result, for example, after foreclosure and sale of a borrower’s home if the proceeds are insufficient to repay the loan in full. The unpaid portion of the loan then becomes unsecured mortgage debt. Unsecured mortgage debt is even lower in priority than a junior lien, as the property that originally served as collateral for the loan can no longer be seized in satisfaction of the debt.

Variable Interest Rate: A loan with a variable interest rate has an interest rate that is scheduled to increase over time. Variable rates include step-rates (where the rate increases in regular intervals over a set number of years, up to a defined cap) and adjustable rates (where the rate is periodically adjusted based on an index rate). In contrast, a loan with a fixed interest rate has an interest rate that does not change over the course of the loan.
